

DERWENT

Battery Operated Sharpener

This excellent pencil sharpener has a multitude of practical features:

It can sharpen up to five different pencil diameters including Jumbo pencils

There is a dial on the base of the sharpener which, when turned, will alter the sharpness of the point of the pencil.

The base of the sharpener can be rotated so you can achieve the best position to hold your pencil as you sharpen it. It works perfectly and very comfortably for both left handed and right handed individuals.

It contains a visible shavings reservoir allowing you to see when the sharpener needs emptying.

The sharpener features an extra hole to sharpen HB pencils (the most popular size pencil.)

DERWENT

Manual Twin Sharpener with Reservoir

This manual twin sharpener with reservoir is suitable for all Derwent fine art pencils from Watercolour to Coloursoft.

A sleek, compact, yet sturdy sharpener that is perfect for use in both the studio and out in the field.

The sharpener has a large visible reservoir that will not only hold all the shavings securely, but makes it easy to see when it is full.
