

# pencils for all ages

From wallets of chunky colour and graphite pencils for the very young to bulk pencil packs for classroom use, Lakeland is the name to trust for quality and value.

## Wallets

All Lakeland pencils are available in reusable plastic wallets of 12 or 24, ideal for carrying around in a school bag.

## Lakeland Jumbo

Specially designed for small hands, Lakeland Jumbo has a chunky, easy to grip hexagonal barrel and an extra wide colour or graphite strip.

## Lakeland Colouring

Bright, bold, traditional drawing pencils with a soft colour strip, ideal for the younger artist aged 6 - 11.

## Lakeland Colourthin

Ideal for slightly older children, from 12-15 years, these quality pencils have a slim colour strip and hexagonal barrel, perfect for detailed work.

## Class Packs

Lakeland Jumbo, Colouring and Colourthin pencils are also available in convenient, economical class packs. These sturdy packs encourage pupils to look after their pencils and store them properly after use.

## A family of drawing pencils

from the makers of

DERWENT

# Quality drawing

The best-loved name in colour pencils now offers a whole range of quality drawing media for aspiring artists of all ages.

## Lakeland Painting

These versatile water soluble pencils can be used wet or dry on wet or dry paper to create a variety of exciting effects.

## Lakeland Graphite

Dramatic and expressive, Lakeland Graphite has a smooth, non-scratchy graphite strip ideal for creative drawing by children and adults alike.

## Working with graphite pencils

- 1 An area of solid colour is called tone. Create different tones with your graphite pencils by pressing firmly or gently with the different degrees.
- 2 Use the harder degrees such as 2H for fine, crisp lines and the softer degrees such as 2B to create a soft, smudgy effect.
- 3 To create an impression of depth, draw parallel lines closely together (called hatching). For added texture and form, draw a series of parallel lines, crossing each other at angles (called cross-hatching).

## Working with colour pencils

- 4 Apply different colours on top of each other to create many more colours from your original selection.
- 5 Try drawing lots of dots in different colours - some large, some small, some close together, some not so close. See how this creates different effects when viewed from a distance.

**Lakeland Pencil Range**

- wallet 12 colouring pencils 33326
- class pack 144 colouring pencils 33328
- wallet 12-HB graphite pencils 0700267

- 5 refill packs of each degree 0700284 - 0700288
- tub of 72-24 of each HB, B, 2B degrees 0700283

## Working with painting pencils

- 6 To create soft, rich colours wet the paper first with a paintbrush and water then draw on it with dry pencils.
- 7 For an authentic watercolour effect, draw a picture with dry pencils then wash over it lightly with a wetted paintbrush.
- 8 For strong, dramatic images, try lifting colour directly from the pencil tip using a fine wetted paintbrush, then 'paint' your picture!

- Paintbrush
- tub of 72-24 of each HB, B, 2B degrees 0700283
- set of pencils
