Smooth, vibrant colour pencils

Soft, Smooth, Rich Colour

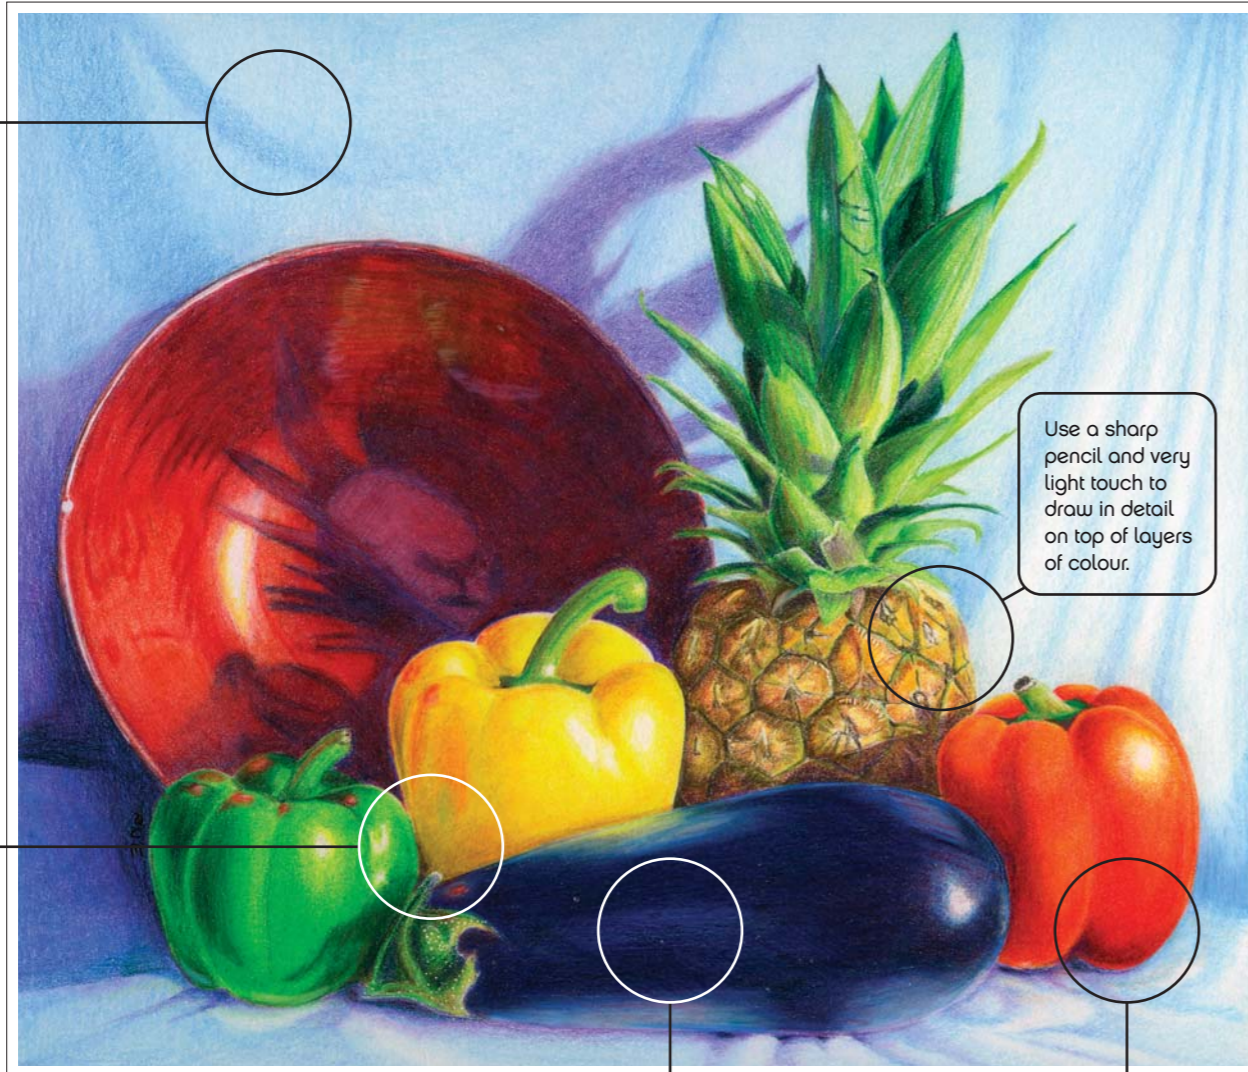

This fabulous pencil from Derwent has a soft, velvety strip, ideal for the quick, dense application of bold, vibrant colour. The unique formulation is also highly blendable, allowing an infinite spectrum of subtly different tones to be created. Although perfect for bold, contemporary drawings and sketches, Derwent Coloursoft can also be sharpened to a fine point for more detailed work, such as fashion illustration, animal portraiture and landscapes.

Derwent Coloursoft is a range of 72 superb colours, specially chosen for their richness and versatility. A panel of professional artists, who use soft textured pencils, have extensively tested the range and are very impressed with its performance. The pencils produce exceptional depth of colour on a wide range of drawing surfaces and interesting effects can be achieved using different types of paper. For rich, vibrant colour with easy blendability, Derwent Coloursoft is the perfect choice.

Derwent Coloursoft is available individually, in a blister pack of 6 specially selected colours or in assorted tins of 12, 24, 36 or 72. There is also a beautiful wooden box containing the full range of 72.

Bob Ebdon created this drawing and explains some of the techniques he used in the drawing process.

Use a light touch and the side of the pencil for soft even layers. The background tone was built-up using

The highlights are the White paper showing through – preserve this in your drawing. I softened the edges using White. Also, look out for reflected colour in shiny objects.

The intense colour was built up in many layers from light to dark using Blue, Electric Blue, Indigo and Royal Purple and then burnished using the White pencil. This blends them all together smoothly and adds a glow, which shows through when you add the colours again on top of the White.

These pencils are a delight to use, and really deliver what I look for most in coloured pencils - colour! Luscious, intense colour, in layer upon layer. Their softness means that they glide onto the page, giving a smooth even coverage. A beautiful addition to the Derwent range of quality coloured pencils.

Bob Ebdon

'Add richness to landscapes'

Graham Brace

My pictures are always highly detailed and as a result my criteria in pencils is quite demanding. They must be resilient; blend and burnish well; lay down strong rich colours with good coverage; lift out easily with knife and eraser and work comfortably with other types of pencil. I needn't have worried... Coloursoft came through with flying colours!

Graham Brace

A step by step guide to create rich and vibrant illustrations

Start with the lightest colours - Acid Yellow, Deep Cadmium, Blood Orange, Deep Red.

Treat the stem in the same light to dark way, using Yellow Green, Pea Green and Dark Green, but do not burnish; it is not shiny!

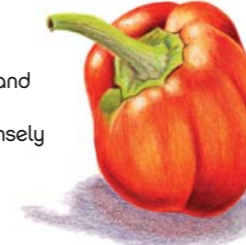

Burnish with White to blend these together and add a glow.

Build up the darks using Green as a complementary colour to the red, covering with Deep Red for the last layer.

Re-layer the reds and oranges. See how smoothly and intensely these go on now.

Add a shadow with Royal Purple and some reflected Deep Red.
